ABOUT US

In 2022, VOLT AUTO began operating as a multi-brand vehicle showroom. At the same time, after-sales service is one of the areas we prioritize in order to assure customer satisfaction and develop our services year after year.

Over the years, Chinese automakers have taken note of our progress and achievements. It is for this reason that they have trusted us with their brands.

With six brands officially part of our portfolio, we are able to offer top-tier sales with official warranty followed by after-sales service through our official partnerships.

How to reduce car expenses?

One of the objectives that every company strives for is to reduce costs. In a rapidly developing world, prices cannot stay steady. Inflation impacts all sectors. One of the most significant obstacles that companies face with a car fleet is fuel consumption. The rising cost of gasoline causes increased expenses over time.

The solution is to transition to electric automobiles.

Electric vehicles can save up to 90% on fuel and maintenance expenses, making them a more affordable means of transportation than internal combustion engine vehicles.

Thus, you save
10,000 AZN
per year in fuel
and maintenance
costs!
